

THE PROMISE OF SUSTAINABILITY

Colgate-Palmolive invites several million homes to create a healthy and sustainable future.

For more information, visit our [Colgate-Palmolive Global Sustainability Page](#).

LOCALIZING THE PLAN TOWARDS SUSTAINABILITY

Working hand in hand to become a zero-waste organization, Colgate-Palmolive Philippines invites Filipino homes to create a healthy and sustainable future - starting with our own home.

OUR HOME

Build a culture of sustainable living among Colgate-Palmolive employees

EVERY HOME

Drive sustainability in every home with the power of our brands

OUR COMMUNITIES

Help to uplift the lives of the people and the community through meaningful partnerships

PLANET HOME

Safeguard our planet and reduce our footprint and impact on the environment

As a first step, Colgate-Palmolive Philippines is moving into recycle-ready packaging, starting with Palmolive sachets and cartons.

INTRODUCING PALMOLIVE RECYCLE-READY PACKAGING

HAIR CARE SACHETS AND SOAP SACHETS

We have transitioned to a mono-material - a packaging type with only one form of plastic which makes our sachets ready for recycling.

The Resin ID Code Logo and What It Means

The number on the logo is called a Resin ID Code. It indicates the type of plastic material that the packaging is made of. A material classified as Resin Identification Code 5 is made from polypropylene and recyclable in a stream that collects and reprocesses the flexible form of this material.

SOAP CARTON

Did you know: We use paper with high-recycled content (90%). These recycle-ready cartons are non-laminated, making it possible to re-process.

OUR INITIATIVE

We are working on increasing acceptability of this packaging in the recycling stream by building partnerships with recycling and upcycling organizations.

TAKE PART IN BUILDING A SUSTAINABLE FUTURE

Colgate-Palmolive Philippines is committed to taking part in a more sustainable lifestyle -- for the people, communities, and the planet - and we're working on building partnerships with key organizations to move towards achieving our sustainability goals.
